

## **Headteacher's Comment**

I would like to take this opportunity to thank Mr Khan, Amelia's Dad, for providing one of his delivery vans and drivers to collect fifteen tables from St. Francis of Assisi Catholic Primary School, Harehills and have them delivered to school for free! The children and staff really do appreciate this kind gesture and the tables look fantastic in the classroom.

I am also happy to reveal the name chosen for this classroom which had previously been Class 3 will now be known as ...**The Haven**. Thank you to those who took time to vote.

## **Star Pupils**

Congratulations to our Star Pupils this week! All chosen by their class teachers:

### **Class 1**

Emmeline M - for being an amazing mathematician, by completing the missing numbers in reverse operation calculations! WOW!

Maxton M - for working really hard all week and showing real maturity.

Poppy G - for her wonderful home learning, completing the school work set on top of lots of other activities and games.

### **Class 2**

Charlie A - for great scores on his Purple Mash Maths work.

Alfie McB - for great phonics knowledge.

### **Class 3**

Alex M - has produced exceptional project work on Animals and Living Things. Alex has taken a huge amount of time and effort in producing a fantastic information booklet all centered around the Science topic given last term. This is an outstanding piece of work Alex and you should be very proud. Well done!

Zoe P - consistently producing a high standard of work and helping others within the bubble. Zoe has written an excellent vivid description this week describing her own environment of a destroyed ocean. She has also produced some excellent art work around the topic, showing the devastating effects pollution and plastic have on our oceans. Well done Zoe!

#### Class 4

Nathaniel P – for writing a brilliant advert for Hawksworth CE Primary.  
Jake T-C – for his great work based around the survival topic.

#### Class News

#### Class 1

This week we have explored the story 'Mr Gumpy's Outing', we have writing about our own special outings, ordered sentences and have done problem solving in maths based on Mr Gumpy and his boat. In Science we have learnt the parts of a plant and labelled our diagrams. We worked hard doing some observational drawings of a plant and made our pictures really detailed. We had so much fun making our own tin foil boats outside and testing them to see if they would float or sink. We read the bible story 'Forgiven and Grateful' and had a discussion around feelings. We enjoyed drawing a feelings poster while listening to calming music. It was lovely to see Father David again for our weekly live collective worship. *Mrs Malin and Mrs Metcalfe*

Class 1 Observational Art

#### Class 2

Class 2 have been adding and subtracting using a 100 square this week bridging across 10. It was very tricky. In Literacy, we have been reading the story 'The Way Back Home' and had to write a postcard from the boy to the Martian and write a conversation between the two characters in speech bubbles. The home learners have produced some great pieces of writing too! We have been working hard on our phonics and spellings and using these to write more independently. We have also done RE, Science, Physical Activity and Art this week. A very busy week completed! *Mrs Oliver*

### Keyworkers News

This week in the Key Worker Bubble we became Marine Biologists and learnt all about the 5 oceans of the world. We also investigated how we treat the environment and the impact pollution and plastic have on our oceans. We located the oceans around the world, learnt facts about each ocean and all the animals that live there. *Mrs Dereix*

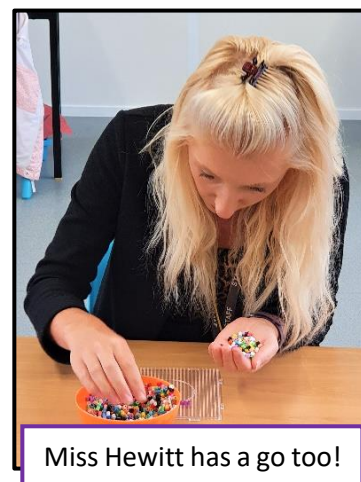

The children in the Keyworkers bubble celebrate the news of Miss Ward graduating with a 2:1 degree in Primary Education. Well done Miss Ward!!

### Class 4

This week Class 4 have undertaken an Arithmetic test and recorded some fabulous scores, showing they are working hard to fill gaps in their Maths learning. We have studied how to keep a healthy body during Science; looking at how sailors contracted scurvy and the importance of having a balanced diet. We also thought about the Black Lives Matter movement, working from a video called 'Swings of Change' and completing research on the Transatlantic Slave Trade. We have also been working hard writing an advertisement for Hawksworth, based on the children's experiences of their time here. Hopefully some of these will be recorded and sent out to the parents of next year's Reception children to provide an insight on all they have to look forward to at Hawksworth Primary! *Mr McGuire*

### Kestrels news

Hama beads are the perfect way to create brilliant designs and decorations on rainy days. The Kestrels children and staff have enjoyed creating fun and colourful designs this week.

Miss Hewitt has a go too!

Best wishes and thank you for your continued support.

*Mr Dale Norris*
